CHILDREN SKIN AND HAIR CARE PRODUCTS

Introduction

BBK started operating with the production of beauty whitening and anti-stain creams about fifty years ago. Over the recent years, BBK has successfully promoted its products by utilizing the latest technologies in the world to achieve customer satisfaction like before. Like Paraben, BBK products are free of harmful materials and suitable for different types of skin and hair.

And now, by producing products suitable for children, it has been able to take a new step in meeting the needs of consumers.

All baby baby products have been studied and formulated in R&D research and development unit in cooperation with scientific centers and after various experiments and tests on products and raw materials to produce products suitable for children's delicate skin.

Baby Moisturizing Cream

The BBK baby moisturizing cream protects children's skin from dryness. Baby moisturizer is effective in maintaining its moisture by supplying water to the skin and is very effective in preventing skin dryness. This cream is easily absorbed by the skin and does not leave any trace of fat.

Baby Cream with Calendula Oil

The baby cream containing calendula oil, in addition to having anti-inflammatory properties, heals sensitive and inflamed skins, and due to these properties, it is used for the following purposes:

- Painful urination (dysuria) of babies
- Inspect bites
- Healing and treatment of sunburns

Talc Cream

By creating a layer on the skin, this product prevents skin friction and also by absorbing excess moisture, it inhibits burns, redness, inflammation and dryness of the sensitive skin of the child. The regular application of this cream to the children not only prevents the skin inflammation and redness, but also keeps the skin soft and flexible and makes the skin fresh and lively by creating a silky texture.

Baby Foot Cream with Zinc Oxide

The children's foot protective cream containing zinc oxide, with the capability of healing skin cells in cases of burns and inflammation, protects the skin from adverse environmental factors by creating an impermeable layer on the skin and it is also effective for preventing painful urination (dysuria) in children. It acts as an astringent agent and relieves skin inflammation.

Baby Body Lotion

The BBK baby body lotion has ingredients that moisturize the baby's skin and take care of the skin against environmental factors and dryness. The baby body lotion can be used from the first days of children's birth. These products have a mild scent and create excellent softness on the baby's skin, are free of alcohol and Paraben, and prevent allergies and skin sensitivities.

Baby Petroleum Jelly (Vaseline)

Vaseline is one of the most popular substances, which is necessary and useful for children's skin due to its special compounds, and by creating a layer between the skin and the surrounding environment, it prevents excessive evaporation of skin water and prevents it from drying out.

Baby Shampoo

Due to its suitable ingredients content, the BBK 300ml baby shampoo restores the skin and hair to its natural and original state and gives the baby a sense of peace with its unique and gentle scent. The BBK baby shampoo is suitable for children and does not cause burning and itching of the eyes. In addition to having excellent cleaning power, this product is hypoallergenic and does not irritate the skin, and is also suitable for adults with sensitive skin and hair.

Baby Body Wash

The BBK body wash is suitable for children with sensitive skin and brings a calm and comfortable sleep to the child. This 300-ml body wash has the effect of softening the skin and does not dry the skin of a child, which is much more sensitive than the skin of adults. The pH level of this product is normal and in addition to children, adults with dry, sensitive skin and eczema can also use it on a daily basis.
